## WORK EXPERIENCE

### UX Design Intern

Found Fair Ventures, Berlin | Jun 2020 - present

- compiling component library in Figma according to Material UI design guidelines and internal product style guide of a project management application for construction industry
- participating in features redesign aimed at increasing interface learnability while considering backend restrictions
- preparing mid- to high-fidelity wireframes

### Team Leader

Veeva Systems, Budapest | Dec 2015 - Jan 2020

- coordinated numerous customer onboarding projects delivered within agreed deadline, with due data quality and legal compliance
- recognized by employees in a yearly manager satisfaction survey (over 80% satisfaction rate)
- introduced a system of regular team meetings and individual check-ins, which resulted in boosted engagement and decreased turnover
- planned and carried out entry trainings for over 25 new employees

### Researcher

Veeva Systems, Budapest | Dec 2014 - Dec 2015

- lead data preparation for RPF for the first VeevaOpenData customer in Europe (successfully onboarded)
- first researcher in the team to be entrusted with training and mentoring new employees
- received a promotion to a leadership role after one year based on performance and demonstrated initiative

## EDUCATION

### UX Design

CareerFoundry | Nov 2019 - July 2020

- completed 400+ hours of project-based learning under guidance of experienced UX practitioners
- designed an advisory web application following design thinking framework from exploratory research through ideation and prototyping to testing and iterations. View the UX study case [here](#).

### Intro to UX Design

CareerFoundry | Oct - Nov 2019

- mastered the fundamentals of UX design while developing a design for a vocabulary learning app

John Paul II University, Poland | 2009 - 2014

- MA in English Linguistics
- BA in English, Polish-English translations

UX designer passionate about creating smooth and engaging digital interactions. 5+ years of experience in leadership in research and data domains.

Both, customers and team, can count on my goal-oriented mindset and a sharp eye for details.
